"The Studio" vol. 5 December 1998

Susan Hensel has been heard to say that art is one of the sanest, soul-healthy activities that life has to offer. She has also been heard to say that she is an evangelical for books. In fact, she considers books to be the most powerful format she has worked in. She has found that the intimacy of the hand held book challenges the distance between artist and viewer. She allows her art to quietly insinuate itself into the lives of the viewers.

Susan sent me her catalog of artist books that are for sale and I was blown away. These are high quality works of art. If you are a collector, you probably have already heard of her. If not, send for her catalog right away!
